(54) WET TISSUE

(57)Abstract:

PURPOSE: To obtain a product excellent in the feeling of using, from which oil stains and malodor are surely removed by impregnating the base paper for water-containing tissue with a water solution containing a surface active agent which is a tea leaf extract.

CONSTITUTION: Though the kind of tea leaves is not limited, it is preferable to use at least one kind of tea leaves selected from oolong tea, green tea, black tea and mate. Tea leaves are extracted by using a solvent according to an ordinary method. An extracted solution obtained by separating a solid from the extract solution by filtration or an extract obtained by removing the solvent is contained in a water solution by 0.001wt.%, and the base paper for tissue is impregnated with the solution. It is preferable to add 0-1.0wt.% surface active agent and further about 1.0-5.0wt.% ethyl alcohol to a water solution of a tea leaf extract. The wet tissue is improved in its cleaning effect and allowed to possess a deodorizing effect by the action of natural components included in the extract of tea leaves not poisonous to a human body.
